

Understanding Strategy Access

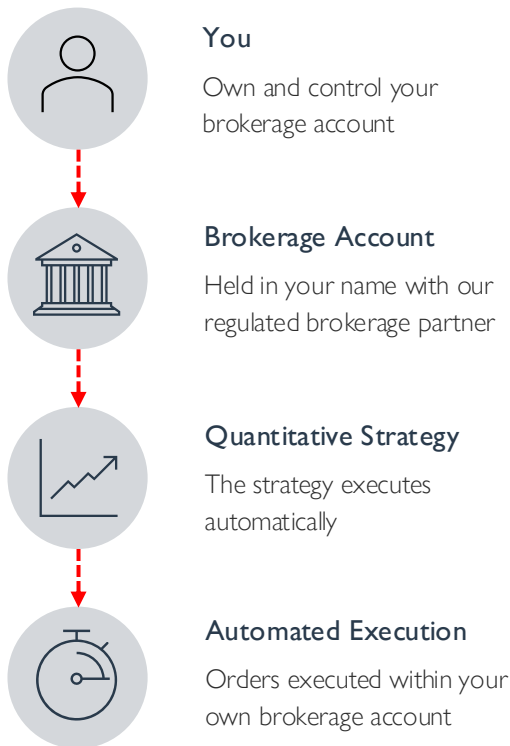

Strategy Access enables you to access our predefined quantitative trading strategy through a personal brokerage account held with our brokerage partner.

You open and maintain the brokerage account in your own name and fund it directly with the brokerage partner. Your assets remain in your brokerage account throughout the entire client relationship.

Once you authorize our trading strategy, execution is performed automatically within your brokerage account in accordance with the applicable strategy parameters.

The operating model is designed to maintain a clear separation between brokerage services, client asset custody and strategy execution.

THE OPERATING MODEL
